## Professional Summary

Results-driven and analytical professional with a strong foundation in data analysis, statistics, and data visualization, leveraging technical skills in SQL, Excel, Python, and data visualization tools to drive business growth and informed decision-making.

---

## Technical Skills

Technical skills include SQL, Excel, Python, Pandas, NumPy, data visualization tools such as Power BI and Tableau, with strong analytical and communication skills.

---

## Project Experience

Developed an Autonomous Data Analyst AI Agent, utilizing Python to build a data analysis pipeline with LangGraph, streamlining data preprocessing, exploratory analysis, and visualization, and reducing manual analysis turnaround time. Created a Career Guidance Chatbot, integrating Random Forest-based salary prediction with live job-market scraping, and incorporating a retrieval-augmented LLM layer for explanation and recommendation traceability. Designed and developed FarmLink, a farm-to-market data and transaction platform, utilizing Android and SQL to connect farmers with buyers, enabling crop listings, order management, and real-time communication. Built a CNN-based image classification system for real-time plant health detection, exposed through a REST API, with containerized deployment using Docker.

---

## Education

B.Tech, Vishwakarma Institute Of Information Technology, Pune, 2023-2027, 8.86/10. Senior Secondary (XII), Nowrosjee Wadia Junior College, Pune, 2023, 81.67%. Secondary (X), Hume McHenry Memorial High School, Pune, 2021, 88.33%.
